These forward-looking statements are based upon estimates and assumptions that, while considered reasonable by Conyers Park and its management, and Advantage and its management, as the case may be, are inherently uncertain. Factors that may cause actual results to differ materially from current expectations include, but are not limited, to approval by Conyers Park's stockholders of the proposed business combination and satisfaction of other closing conditions relating to the transaction, the impact of the COVID-19 pandemic on Advantage's business units, Advantage's estimates of expenses and profitability and other risks and uncertainties set forth in the section titled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in the definitive proxy statement filed by Conyers Park with the Securities and Exchange Commission on October 9, 2020.

Actual results may differ as a result of the completion of the Company's quarter-end closing procedures, review adjustments and other developments that may arise between now and the time such financial information for the period is finalized. As a result, these estimates are preliminary, may change and constitute forward-looking information and, as a result, are subject to risks and uncertainties. Neither the Company's independent registered accounting firm nor any other independent registered accounting firm has audited, reviewed or compiled, examined or performed any procedures with respect to the preliminary results, nor have they expressed any opinion or any other form of assurance on the preliminary financial information.

Disclaimer (2/2)

Non-GAAP Financial Measure and Related Information

This presentation includes certain financial measures not presented in accordance with generally accepted accounting principles ("GAAP") including Adjusted EBITDA and Pro Forma Credit Adjusted EBITDA. These non-GAAP financial measures are not measures of financial performance in accordance with GAAP and may exclude items that are significant in understanding and assessing the Company's financial results. Therefore, these measures should not be considered in isolation or as an alternative to net income, cash flows from operations or other measures of profitability, liquidity or performance under GAAP. You should be aware that the Company's presentation of these measures may not be comparable to similarly-titled measures used by other companies.

The Company believes these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to the Company's financial condition and results of operations. The Company believes that the use of Adjusted EBITDA provides an additional tool for investors to use in evaluating ongoing operating results and trends in and in comparing the Company's financial measures with other similar companies, many of which present similar non-GAAP financial measures to investors. Pro Forma Credit Adjusted EBITDA is presented in a manner consistent with the Company's senior secured credit facilities. These non-GAAP financial measures are subject to inherent limitations as they reflect the exercise of judgments by management about which expense and income are excluded or included in determining these non-GAAP financial measures.

The Company has presented the financial data for the last twelve-month ("LTM") period ended September 30, 2020 by adding the unaudited results of operations for the nine-month period ended September 30, 2020 to its audited results of operations for the year ended December 31, 2020 and then subtracting the unaudited results of operations for the nine-month period ended September 30, 2019. The financial data for the LTM period ended September 30, 2020 does not comply with GAAP.

This presentation and related commentary may also include certain estimates of Adjusted EBITDA and Pro Forma Credit Adjusted EBITDA, including with respect to expected third quarter 2020 results. Due to the high variability and difficulty in making accurate estimates of some of the information excluded from Adjusted EBITDA and Pro Forma Credit Adjusted EBITDA, together with some of the excluded information not being ascertainable or accessible, Advantage is unable to quantify certain amounts that would be required to be included in the most directly comparable GAAP financial measures without unreasonable effort. Consequently, no disclosure of estimated comparable GAAP measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included.

No Offer or Solicitation

This communication is for informational purposes only and is not intended to and does not constitute, or form part of, an offer, invitation or the solicitation of an offer or invitation to purchase, otherwise acquire, subscribe for, sell or otherwise dispose of any securities, or the solicitation of any vote or approval in any jurisdiction, pursuant to the proposed transactions or otherwise, nor shall there be any sale, issuance or transfer of any securities in any jurisdiction in contravention of applicable law. Any offering of senior secured notes or other debt securities will be offered in a private placement to qualified institutional buyers pursuant to Rule 144A under the Securities Act, and to certain non-U.S. persons in transactions outside of the United States in reliance on Regulation S under the Securities Act and will not be registered under the Securities Act or the securities laws of any state or jurisdiction, and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements.

Neither this presentation nor any related commentary shall constitute an offer to sell or the solicitation of an offer to purchase any securities, nor shall there be any sale of any such securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

Preliminary Q3 Flash Results

Note: The foregoing preliminary financial information for the quarter ended September 30, 2020 is subject to completion of the Company's quarter-end close procedures and further financial review and represents the Company's current expectations as to what it will report for such quarter. Actual results may differ as a result of the completion of the Company's quarter-end closing procedures, review of adjustments and other developments that may arise between now and the time such financial information for the period is finalized. (1) Preliminary Q3 2020E results shown using the mid-point of the Company's disclosed range. Please see the Appendix for further detail.

Q3 Preliminary Flash Results Reflect Improvement in Trends

- Continued strength and gains in Sales segment
 - Strong center-store / eat-at-home trends remain in place
 - Food service channel remains weak, but beginning recovery
 - European Joint Venture improved but still soft
 - E-commerce (on-line, click-and-collect) business gains continue
- Marketing segment down substantially, but with improving trends in Q3 versus Q2
 - Some in-store sampling started in the third quarter
 - Event volume increased from approximately 20,000 events in April to approximately 120,000 in September; still below the nearly 400,000 events in September of last year, but the beginning of a rebound we expect to continue
- Continue to manage costs with discipline

Q3 Results Reinforce Financial Expectations and Investment Thesis

- Modeling of business (\$475m of 2020E Adj. EBITDA) reflected assumption that COVID-related restrictions would remain in place during the summer and would not likely abate in near-term
- Assumed some moderate return to Sampling, which did occur and will continue to do so into 2021
- As COVID-related restrictions ease and/or a vaccine becomes available we expect to see shifts back to more normalized patterns
 - U.S. Experiential (Sampling), U.S. Food Service, and European JV expected to accelerate, U.S. Center-store likely to moderate
- Will also capture learnings / upside from COVID which we expect will benefit the business in the future (e.g., real-estate savings, adoption of online grocery pick-up sampling, e-commerce traction)

CPII Remains Excited About Investment and Value Creation Opportunities

- Organic growth via share gains in Sales segment, expansion of marketing segment (experiential, e-commerce)
- Platform for accretive tuck-in M&A, with focus on new technology and services
- Attractive entry point given COVID earnings dip in 2020 with strong, full recovery expected over the course of 2021 and 2022
- Valuation at 10x Adj. EBITDA attractive versus relevant comparable companies in CPG and business services

Thank you

I'll now turn the call over to Dave West, CEO of Conyers Park II.

Dave West

Thanks. My name is Dave West, CEO of Conyers Park II, and I'm joined today by Tanya Domier, the CEO of Advantage. We will provide a brief update with respect to the business combination between our two companies.

I'll start with a brief transaction update, highlighting our progress to closing. Tanya will highlight preliminary Q3 results, which will be used in conjunction with the company's debt offering, and finally, I'll close our comments with a review of our continuing investment thesis.

We are progressing to close the transaction by the end of October. Our proxy is filed, regulatory approvals have been received, and our shareholder vote is scheduled for October 27. We have commenced a refinancing process to replace Advantage's existing senior secured credit facilities, consistent with the \$2.5 billion of committed debt financing disclosed in connection with the business combination.

We have conducted initial meetings with sell side analysts, expecting coverage initiation post closing.

Finally, we expect to close by the end of October and release final Q3 earnings in mid-November.

With that, I'll turn it over to Tanya for some color on Q3.

Tanya Domier

Thank you, Dave. I'm Tanya Domier, CEO of Advantage. We put out a press release and posted a slide presentation on the Advantage website that will be filed as an 8-K by Conyers Park. These materials include our preliminary third quarter results, which you'll find on Page 5 of the presentation materials. I'll pick up there for those of you that would like to follow along.

Third quarter 2020 revenue is expected to be in the range of \$779 million to \$789 million. We are pleased to note that this represents sequential growth of about 22% compared to the second quarter of 2020 at the midpoint of the range. On a year-over-year basis, this would be a decline of approximately 20% compared to the third quarter of 2019 using the midpoint of the range, and represents improvement over the 30% decline in revenues for the second quarter of 2020 compared to the second quarter of 2019.

We were especially encouraged that the sequential revenue improvement that we saw in the third quarter was in both the Sales and Marketing segments. And importantly, we saw the parts of our business most negatively impacted by COVID-19 beginning their return to normal operations.

Third quarter 2020 Adjusted EBITDA is expected to be in the range of \$134 million to \$138 million. This represents sequential growth of approximately 22% compared to the second quarter of 2020, and a decline of approximately 6% compared to the third quarter of 2019, in each case using the midpoint of this range.

We are pleased with the improvement in trends that we saw in the business in the third quarter and it was important to see the beginning of a sequential recovery from the second quarter COVID-driven low.

In our Sales segment, we continue to see strength in our core headquarter sales and merchandising services in traditional channels resulting from increased revenue in both the in-store and e-commerce portions of this business from incremental at-home consumption. This business continues to trend favorably versus both prior year and prior quarter.

We also began to see recovery in the foodservice and international businesses, both improving versus second quarter lows. The improvement in foodservice was driven by increased sales volume as restaurants and education channels slowly began to reopen in the quarter. The improvement in our international business was driven by the easing of COVID-related policy restrictions in Europe that allowed our in-store activities to begin to return to operation.

Momentum in the Marketing segment was driven by the beginning of the relaunch of in-store sampling activity with some of our retail accounts, as well as growth in our digital business.

We temporarily suspended in-store sampling operations in partnership with our retail clients in March. Over the last few months we have seen major accounts eager to bring back sampling, of course, in a measured way that protects health and safety. Several retailers began to bring in-store sampling back to stores in June and we are pleased with the progress we're making.

Safety protocols are critical and we have spent considerable time and effort against safety measures to protect our associates and those shopping in-store. Where we have resumed in-store sampling, we have received positive feedback from our retail partners, from shoppers and from the brands that participate in these programs.

Sampling event volume has increased from approximately 20,000 events in April to approximately 120,000 in September. This is still below the nearly 400,000 events of September last year; but this represents a significant rebound and we expect this trend to continue to improve.

In summary, we are pleased that we saw momentum in the Sales and Marketing segments in both the in-store and online components of the business.

While our results are still preliminary, we're also happy that we continue to be able to manage costs with discipline during this difficult operating environment as the business recovers nicely from the Q2 COVID lows. We expect that this momentum will continue.

Dave?

Dave West

Thanks Tanya.

The company's preliminary third quarter results are consistent with the financial expectations we had for the business and continue to reinforce our investment thesis. Our modeling of the business reflected the assumption that COVID-related restrictions would remain in place during the summer and would likely not abate in the near term. We assumed some moderate return to sampling, which we saw resume in the third quarter and expect will continue to return into 2021.

As COVID-related restrictions ease and/or a vaccine becomes available, we expect to see shifts back to more normalized patterns of consumer behavior. In this scenario, we would expect the U.S. Sampling, U.S. Foodservice, and European joint venture businesses to accelerate. The U.S. center-store business would likely moderate.

Finally, we believe the management team will capture learnings and ultimately see upside from COVID, benefiting the business in the future. For example, the team has used COVID as a catalyst to rationalize the cost structure, implementing a plan to realize meaningful real estate savings. They've also done a good job of serving clients during this difficult operating environment and, as a result, have seen adoption and traction in the online grocery pick-up and e-commerce businesses.

We at Conyers Park remain excited about our potential investment and the value creation opportunities at hand. We believe this is a unique and compelling situation where there are multiple vectors available to us for shareholder value creation.

First is a highly visible path to organic growth. There's a significant whitespace opportunity to sell new services to existing clients who often enter the business looking for sales services but then add marketing services over time. There's an opportunity for incremental growth via share gains as well.

The second vector is an attractive reinvestment opportunities in M&A. The team has completed over 60 acquisitions since 2014 at attractive prices and believes there are additional opportunities to grow through M&A, either in new market areas in sales or via additional capabilities in technology.

Third, we believe that we are entering at an opportunistic time with an attractive valuation. We are paying 10x Adjusted EBITDA for Advantage, a meaningful discount to U.S. CPG companies at over 16x, and the 12x to 20x multiples for business services companies.

The temporary COVID impact to earnings sets us up with an artificially low earnings base and with full confidence in outsized growth for the next several years. Oftentimes to get this type of event-driven dip, you need to buy a business which has been mismanaged or has poorly executed its strategy; here, the team and strategy are sound. In fact, in other CPG assets where we've done due diligence, we were asked to pay a premium for COVID-related loading that may or may not actually be sustainable.

And finally, we think there is a compelling value realization opportunity from multiple expansion as the business performs and the market learns to better understand the Advantage model. We have a history of underpromising and overdelivering. Rest assured we will apply that approach here as well.

Normally, you may have one or two of these paths to value, but it is very rare to have all four working in an investment as we see here with Advantage.

With that, we will reiterate that we are excited about this combination and look forward to closing at the end of the month. Thank you very much for joining us today.

Advantage Solutions and Conyers Park II Provide an Update on Their Planned Combination, Announce Launch of Refinancing and Provide Preliminary Q3 Results

NAPLES, FL, and IRVINE, CA – October 19, 2020 – Conyers Park II Acquisition Corp. (“Conyers Park”), a publicly traded special purpose acquisition company, and Advantage Solutions Inc. (“Advantage” or the “Company”), the leading provider of outsourced sales and marketing services to consumer goods manufacturers and retailers, today provided an update on activities as they move forward with their planned combination, including the announcement of the refinancing process and preliminary results for Advantage for the third quarter of 2020.

Conyers Park management also confirmed that the special meeting of stockholders to approve the pending combination with Advantage will be held at 10 a.m. Eastern Time on Tuesday, October 27th at the offices of Kirkland & Ellis in New York. The consummation of the business combination is expected to follow shortly thereafter, subject to final stockholder approval and satisfaction of other customary conditions.

“We believe Advantage Solutions offers Conyers Park shareholders a great opportunity for future value creation. The company has a long, successful track record in the consumer products industry,” said Jim Kilts, executive chairman of Conyers Park. “We believe that Advantage offers a strong path for future growth given its robust, diverse customer base, excellent management team and opportunities to serve brands and retailers in new ways. We are excited about both the organic and M&A growth prospects for this business and believe the transaction represents a highly attractive valuation for CCAA shareholders.”

Refinancing Underway

In connection with the business combination of Advantage and Conyers Park, Advantage has launched a refinancing process to replace its existing senior secured credit facilities. The refinancing transaction is expected to consist of a combination of senior secured credit facilities and senior secured notes. The refinancing transaction is being led by Bank of America. As previously disclosed, the company has procured committed financing in connection with the transaction. The ultimate timing and terms of such refinancing transactions are subject to market and other conditions. As previously announced, as part of the combination, Conyers Park has also secured commitments of \$700 million of equity in a common stock private placement that will be used to pay down existing Advantage debt.

“We are excited to announce that we’ve launched the process to refinance our existing debt as part of our combination with Conyers Park. This transaction will significantly reduce our annual interest expense and enhance our leverage, liquidity and maturity profile, better positioning us to pursue attractive organic and inorganic investment opportunities to build the business for clients, thereby benefitting our shareholders,” said Tanya Domier, chief executive officer.

In connection with the financing transaction, the Company is releasing certain unaudited preliminary third quarter financial results.

Preliminary Third Quarter Financial Results

Third quarter 2020 revenue is expected to be in the range of \$779 million to \$789 million. This represents a decline of approximately 20% compared to the third quarter of 2019 and sequential growth of approximately 22% compared to the second quarter of 2020, in each case using the mid-point of this range. The 20% decline in revenues for the third quarter of 2020 compared to the third quarter of 2019 is an improvement over the 30% decline in revenues for the second quarter of 2020 compared to the second quarter of 2019.

Third quarter 2020 Adjusted EBITDA is expected to be in the range of \$134 million to \$138 million. This represents a decline of approximately 6% compared to the third quarter of 2019 and sequential growth of approximately 22% compared to the second quarter of 2020, in each case using the mid-point of this range.

“We are pleased with improving momentum in the third quarter and we believe it represents the beginning of a recovery from the second quarter’s COVID-19 driven decline,” said Tanya Domier. “The sequential revenue improvement we saw in the third quarter was broad-based across both the Sales and Marketing segments and was primarily driven by the parts of our business most negatively impacted by COVID-19 beginning their return-to-normal operations, as well as from continued strength in the other businesses. The momentum in the Sales segment was driven by growth in our traditional channel and e-commerce businesses. Momentum in the Marketing segment was driven by the beginning of the re-launch of in-store sampling activity with certain retail accounts as well as growth in our digital business,” Domier added.

Management expects to formally report full results for the third quarter and provide an update on the business in mid-November.

The foregoing preliminary financial information for the quarter ended September 30, 2020 is subject to completion of the Company’s quarter-end close procedures and further financial review and represents the Company’s current expectations as to what it will report for such quarter. Actual results may differ as a result of the completion of the Company’s quarter-end closing procedures, review of adjustments and other developments that may arise between now and the time such financial information for the period is finalized. As a result, these estimates are preliminary and may change. Neither the Company’s independent registered accounting firm nor any other independent registered accounting firm has audited, reviewed or complied, examined or performed any procedures with respect to the preliminary results, nor have they expressed any opinion or any other form of assurance on the preliminary financial information.

Advantage believes these non-GAAP measures provide useful information to management and investors regarding certain financial and business trends relating to Advantage's financial condition and results of operations. This press release also includes certain estimates of Adjusted EBITDA, including with respect to expected third quarter 2020 results. Due to the high variability and difficulty in making accurate estimates of some of the information excluded from Adjusted EBITDA, together with some of the excluded information not being ascertainable or accessible, Advantage is unable to quantify certain amounts that would be required to be included in the most directly comparable GAAP financial measures without unreasonable effort. Consequently, no disclosure of estimated comparable GAAP measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included.
